# FAQ

## **I am overwhelmed and don't know what to order.**

Start with the basic package! This will do nicely for making small prints or posting online.

## **What resolution are the scans?**

Regular scans are about 6mp, or 2000px on the short side. Premium scans are about 20mp, or 4000px on the short side.

## **Will I get my negatives back?**

Yes. Make sure to pick them up within 1 month of order completion, or we can ship them.

## **Is my film ready yet?**

We promise we will email you as soon as it's done. Log on to our customer portal (the link is in your receipt email) to check on its status and ETA. Please understand that turnaround times are estimates, not guarantees.

## **Can you put the pictures on a CD or flash drive?**

We would prefer not to. Instead, we will email you a link to view, download, and manage your images. If you insist, we will put them on a flash drive that you must supply for an extra \$5. No discs.

## **What if my roll comes out blank?**

Don't be discouraged! It's fairly common to get a blank roll due to an exposure issue, broken camera, or film loading issue. We will offer a store credit or refund for scanning/printing fees on blank rolls, but development is nonrefundable.

## **Do you sell Portra?**

Yes. We also have other cool and interesting film from all over the world!

## **What do all these words mean?**

- **Development** means taking the film from your camera and using chemicals to make it into negatives.
- **Negatives** are color and tone-reversed images which can be scanned or printed.
- **Scanning** means converting negatives to digital files you can view on a computer or mobile device.
- **Printing** means making paper copies of the images you can hold in your hands.
